Front-End Languages: HTML, CSS, JavaScript, XAML, ASP.NET

Frameworks/Libraries: Bootstrap, React.js, jQuery, D3.js

Software Deployment: GitHub, Netlify, Git, Filezilla, UNIX commands, Putty, Plix

Software Tools: Android Studio, Visual Studio Code, IntelliJ, Visual Paradigm, GeoGebra, Tableau, PHPMyAdmin, Latex

Software Testing: JIRA, Bugzilla

Graphics: Photoshop, Illustrator, Adobe Animate, Premiere Pro, After Effects, Processing, Final Cut Pro, Camtasia Studio, Autodesk Maya

CERTIFICATIONS

React – JavaScript, Academind (Udemy)

Interactivity with JavaScript, University of Michigan (Coursera)

C Programming, Duke University (Coursera)

Object-Oriented Java Programming, UC San Diego (Coursera)

HTML, CSS, and JavaScript, Johns Hopkins University (Coursera)

Python Programming, University of Michigan (Coursera)

PROJECTS

Grocery Helper - https://bit.ly/GroceryHelperAppAPK (Source Code and Demo Video Link on GitHub)

- Android app created with Java and XML.
- Allows users to create interactive grocery lists with ingredients required to make healthy meals.
- Shows nutritional information and recipes for different meals.

Memory Chef Game – http://bit.ly/MemoryChefDownload (Source Code on GitHub)

- Desktop Game created with C# and XAML.
- Has users memorize a pizza order under a timer and build the pizza from memory.

Culinary Clicks – http://culinaryclicks.website.org (Source Code on GitHub)

- Full-Stack Web Application created with HTML, CSS, JavaScript, Bootstrap, PHP, SQL, and PHPMyAdmin.
- Food image gallery that allows users to create accounts and upload/manage images in a chosen category.
- Super Admin users can manage users, images in any category, and the image categories themselves.
